Paving the way for a broad and
self-evident use of BIPV

Our goal

„BIPV should be a self-evident
part of buildings.“

How it all startet

coming soon

coming soon

coming soon

But why BIPV?

Tremendous potentials for green power.

Decentral production – the whole day.

It's just the most beautiful way to produce electric power.

By that: acceptance.

But what about the costs?

Don't mix it up.

BIPV is the only part of the building,
which has an Return of Invest.

There are good economic reasons for the use of BIPV,
when it comes to efficiency requirements.

You can not measure the soft added values.

Other obstacles?

Complexity

Lack of knowledge

Legal obstacles and uncertainty

So what can we do?

Make it simple.

Reduce costs.

Communicate.
